Hi Emanuele:

Sure... it's perfect for mid-January.

We will be attentive to your availability to schedule it.

If you have any questions or suggestions I will be attentive.

Best Regards.

Milena Fajardo

Hi Milena,

Thank you for your feedback.

I'd be delighted to discuss our quality methodology in more detail and how CORSIA projects fall into that. Shall we schedule a follow up session in mid January?

Thanks for flagging the conference in Colombia - I'll share the details with our marketing/events team.

Best,
Emanuele

Good morning Emanuele:

I apologize for the delay in replying, but I was traveling the week before....

We found the platform you showed us in the meeting very useful, and we are interested in knowing more about how the projects are selected to be available on the platform.

Our objective as an association is to have a list of high value projects that meet all the CORSIA eligibility criteria so that our airlines can compensate through their credits in this program.

Ideally, these projects should be in Latin America and the Caribbean to provide greater added value for the airlines.

Additionally, we would like to inform you that the second edition of the ALTA FUEL & ENVIRONMENT CONFERENCE will have a robust agenda that will address topics related to local initiatives on the production of SAF and other sustainable fuels like hydrogen in Latin America and the Caribbean and related government legal and regulatory frameworks and updates on the jet fuel markets, infrastructure, fees, taxes, carbon offsetting, carbon markets, non-CO2 climate impacts and ALTA industry initiatives on relevant issues.

The conference will take place in Bogota, Colombia from the 12th to 14th of March 2024 at the Hilton Corferias Hotel.

We believe that this could be a great opportunity to raise awareness of the platform among our associates. At this time we will have booths available.

For conference registration, hotel reservation and information on sponsorships, we kindly ask you to access the official web page of the event: <https://alta.aero/fuel/2024/>

We remain attentive if you can share with us the requested details.

If you have any questions or suggestions, please do not hesitate to contact us.

Best Regards.

Hi Milena,

I hope all is well. Have you had a chance to debrief after our last call?

I'd be delighted to continue the discussions and introduce you to our Chief Scientists if this is something you're interested in.

Best,
Emanuele

Hi Milena,

It was great to speak just now.

This is the link to the webinar on the risk & quality of the VCM, you can register using this

link: https://us06web.zoom.us/webinar/register/2616964293246/WN_ZB-6m_ndQfKIRrz6zvllPw#/registration

Look forward to hearing your feedback and progressing the discussions.

Best,
Emanuele

Hello Emanuele:

How are you?

Of course... do you have availability tomorrow 14th at 08:00 am Colombian time?

If you have any questions or suggestions I will be attentive.

Best Regards.

Hi Milena,

Quick nudge, appreciate it's a busy time of the year - are you available for a follow up this week?

Best,
Emanuele

Hi Milena,

It was a pleasure to meet at Aviation Carbon yesterday, I hope you enjoyed today's sessions too.

In regards to our discussion around high-quality carbon credits in the Latam region, there are a couple of options that I think might be of interest:

- **Biochar** project in Brazil (listed on puro earth registry): Biochar is a carbon-rich material that sequesters carbon for hundreds to thousands of years. It serves as a durable carbon removal from the atmosphere and functions as a vital natural component for soil reconditioning and improvement.

- **Enhanced Weathering** in Brazil (also listed on Puro Earth): The weathering of silicate rocks naturally consumes CO₂, a process that regulates the global carbon cycle and the earth's climate. This regulation occurs due to the consumption of CO₂ during the dissolution of silicate rocks, a reaction that produces bicarbonate ions.

I'd be delighted to run through these and other potential projects in more detail over a call - perhaps Thursday next week?

I'd also like to extend the invite to join our upcoming webinar on the risk & quality of the VCM - you can sign up here: https://us06web.zoom.us/webinar/register/2616964293246/WN_ZB-6m_ndQfKIRz6zvIIPw#/registration

Best,
Emanuele
